

CodeRunner Installation and Guide to use CodeRunner

Requirement for CodeRunner

CodeRunner is a question type plug-in in moodle which is provided by the administration and you actually don't have to install anything. As long as you have access to moodle and Administration office gave you access to this plug-in you should be able to use it.

Guide to use CodeRunner

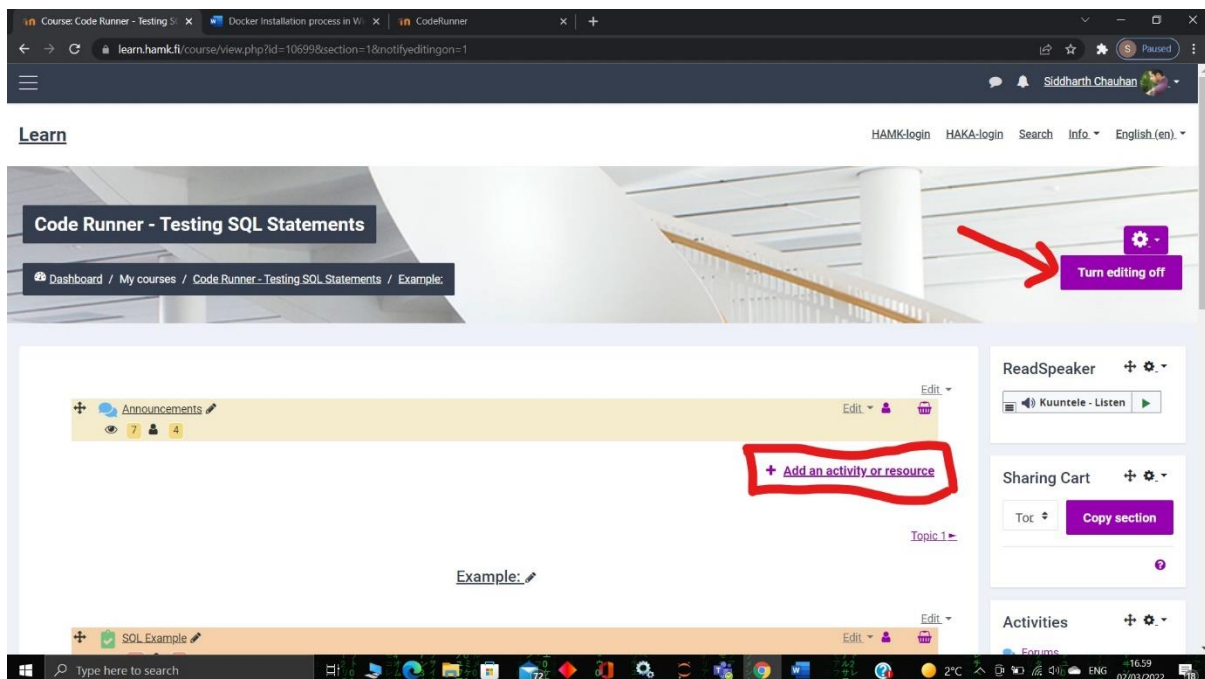

In this guide you'll see how you can create a quiz and the steps you need to follow to create a Question.

Creating a Quiz

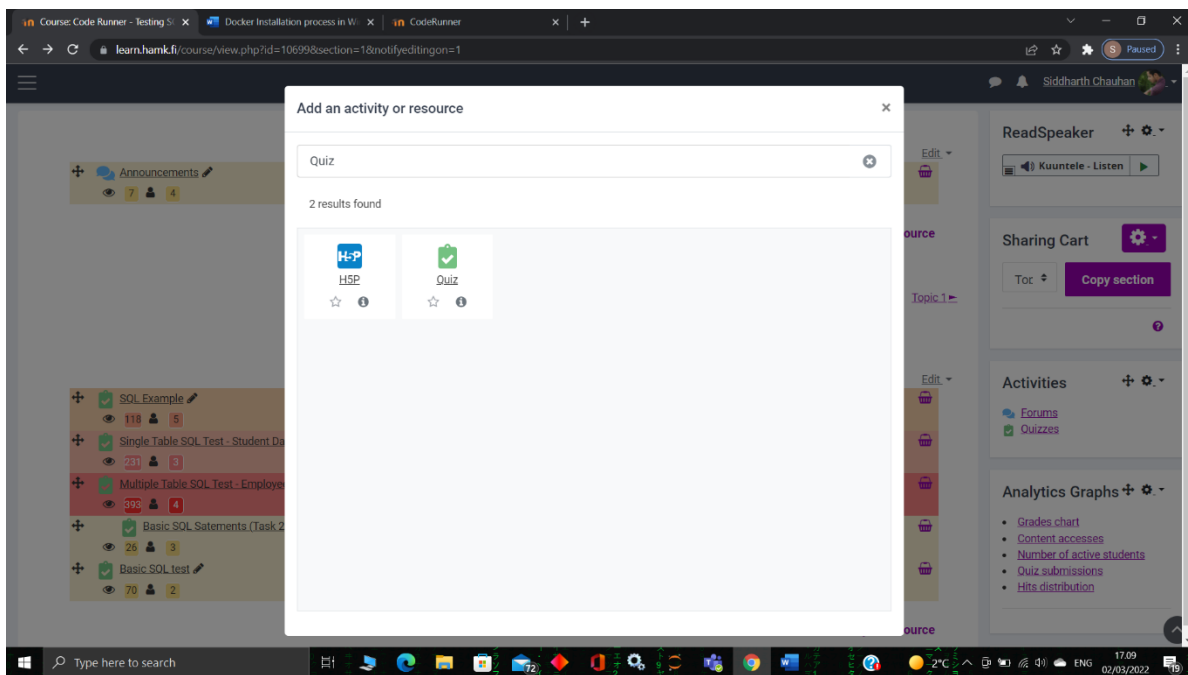

Step 1. Add a new activity

Make sure you have Editing on.

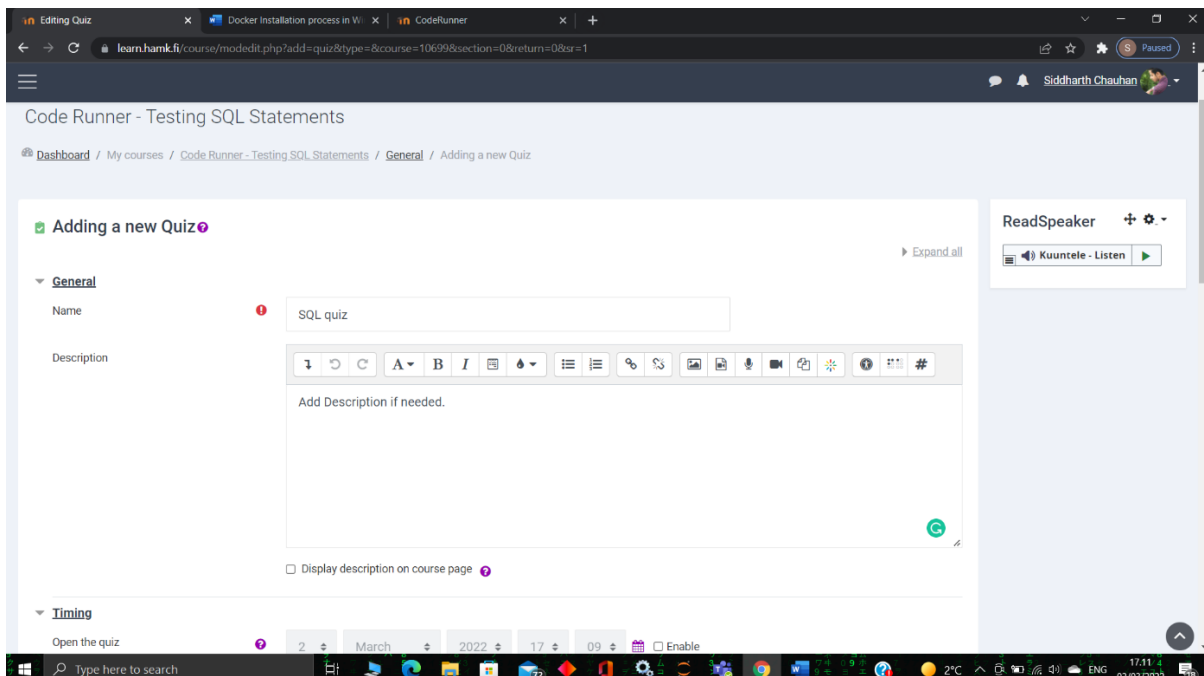

After that click on "+" sign saying Add an activity or resource.

Search for Quiz and Select Quiz

When you click on it, it will show you this Screen and you can define the name of quiz and change the settings as per your need.

Edit the Timing of quiz and Grade as per your choice.

The screenshot shows the 'Editing Quiz' interface in a web browser. The URL is `learn.hamk.fi/course/modedit.php?add=quiz&type=&course=10699§ion=0&return=0&sr=1`. The interface has a sidebar on the left with a menu containing 'Timing', 'Grade', 'Layout', and 'Question behaviour'. The 'Timing' section is expanded, showing options for 'Open the quiz' (2, March, 2022, 17, 09, Enable), 'Close the quiz' (2, March, 2022, 17, 09, Enable), 'Time limit' (0 minutes, Enable), and 'When time expires' (Open attempts are submitted automatically). The 'Grade' section is also expanded, showing 'Grade category' (Uncategorised), 'Grade to pass' (empty), 'Attempts allowed' (2), and 'Grading method' (Highest grade). The 'Layout' and 'Question behaviour' sections are collapsed. The bottom of the browser shows the Windows taskbar with the date 02/03/2022 and time 17:17.

Click Save and return to course.

The screenshot shows the 'Editing Quiz' interface with the 'Save and return to course' button highlighted by a red arrow. The button is located at the bottom of the form, next to 'Save and display' and 'Cancel'. The form includes sections for 'Layout', 'Question behaviour', 'Review options', 'Appearance', 'Safe Exam Browser', 'Extra restrictions on attempts', 'Overall feedback', 'Common module settings', 'Restrict access', 'Activity completion', and 'Tags'. A message at the bottom states 'There are required fields in this form marked'. The browser URL is `learn.hamk.fi/course/modedit.php?add=quiz&type=&course=10699§ion=0&return=0&sr=1`. The Windows taskbar at the bottom shows the date 02/03/2022 and time 17:12.

Now you have successfully created a quiz.
